Elk Hunting and Harvest Across License Years Summary Report

License Years 1999 to 2001

Harvest Surveys

Montana Fish Wildlife and Parks

July 30, 2002

Table of Contents

Introduction 1

1999 to 2001 Executive Summary of Elk Hunting and Harvest
- Statewide and Regional by License Year 5
- By Hunting District and License Year 6

1999 to 2001 Overview of Elk Hunting and Harvest
- Statewide and Regional, by License Year and L/P Category 17
- By Hunting District, License Year, and L/P Type 20

1999-2001 Executive Summary of Elk Hunting and Harvest

Montana Fish Wildlife and Parks
1999-2001 Executive Summary of Elk Hunting and Harvest
Statewide and Regional, By License Year
(Sums of Estimates by Residency and L/P Type within each Location and Year)

Introduction

This report contains statistical estimates of Montana elk hunting effort and harvest success, and the characteristics of elk harvested, during license years 1999 through 2001 (**LY1999-LY2001**).[1] It contains a summary of the elk statistics previously presented in the detailed **LY 1999, 2000, and 2001 Elk Hunting and Harvest Reports**. This report is designed to promote across years comparisons of the key elk hunting and harvest statistics presented in those reports. Refer to the detailed reports for a more complete explanation and presentation of elk hunting and harvest statistics by license year.

Estimation of Elk Hunting and Harvest Statistics

The explanation presented here provides only a brief overview of the information sources and estimation methods used to generate the elk hunting and harvest statistics. Please refer to the detailed **LY2001 Elk Hunting and Harvest Report** for a more complete explanation.

The results presented in this report are based on annual surveys of elk license/permit type holders conducted following the completion of the hunting season. The **Montana Sportsperson/License Database** provides the source of information regarding resident and non-resident sportspersons having some privilege to hunt elk in a given license year. Elk hunting privileges are conferred through a general elk license or a special license or permit. The holder of a **general elk license** may hunt in a wide variety of Districts throughout the state, subject to District regulations (**Hunting Regulations Deer and Elk**). **Special elk permits** are awarded through drawings and confer special elk hunting privileges in specific hunting areas. The holder of a special permit may use their general license outside the area their permit is valid. **Special elk licenses (A7's)** also confer special elk hunting privileges in specific hunting areas, but the holder must give up their general license privileges. Regardless of the license or permit type(s) (L/P Type or Lpt) held, an elk sportsperson may take only 1 elk during a given license year.

Elk sportspersons are separated into **mutually exclusive L/P Type holder populations** distinguished by the particular elk L/P Type, or set of L/P Types, they hold. Elk sportspersons holding a special license or permit are included in the population of that special L/P Type, whether or not they also hold a general license. Those included in the "general only" population hold only a general elk license, and no other elk L/P Type. Each L/P Type holder population is further subdivided based on the residency status of the holder, as determined by the type of Conservation License held. Elk holders are randomly sampled from these mutually exclusive populations and attempts are made to contact and survey all those sampled. Montana resident elk sportspersons were surveyed primarily by phone, while non-residents were surveyed by mail. Overall sample rates, return rates, and effective response rates for each license year are given in the detailed reports.

The elk survey allows hunting effort to be reported as days or partial days spent elk hunting (Hunter Days) for each Hunting District in which effort was expended. Elk harvest is reported by Hunting District of kill, sex-age class (unknown, calf, cow, bull), and time period of kill (unknown plus 7 date intervals corresponding to pre-season, 5 weeks of the standard hunting season, and post-season). Side 1 and 2 antler point counts are reported for bulls.

---

[1] The license year is identified by the calendar year of the general elk hunting season. Late hunting seasons may extend into the following calendar year.

Elk hunting and harvest statistics are computed and organized by **three identifying variables**, each of which may be grouped at various meaningful levels:

1. **Location of Hunting Effort (Loc):**

- **Statewide (State):** Hunting and harvest information is summarized without regard to District of kill.
- **Region (Reg 1...Reg 7, Reg U):** Hunting and harvest information is summarized based on the FWP administrative Region of the District of kill. Hunting and harvest information in an unknown Region is lumped into Reg U.
- **Hunting District (100..799, 999):** Hunting and harvest information is summarized based on the reported FWP Elk Hunting District. Activity in an unknown District in a known Region is reported with the Region number followed by 'XX' (1XX...7XX). Activity in an unknown District and Region is reported as 9XX.

2. **Residency Status of Hunter (Res):**

- **Combined (ALL):** Information is summarized without regard to residency of hunter.
- **MT Residency Status (Resident=R, Non-resident=N):** Hunting and harvest information is summarized by residency of hunter, as indicated by the type of Conservation License held.
- **Sum of Both Residencies (SUM):** Hunting and harvest information for residents and non-resident is summed (within a given Location and Lpt). There is no difference between summarized raw response data for Res=ALL and Res=SUM. There may be a difference between an estimate obtained when residency is disregarded (**Res=ALL**) versus an estimate obtained by summing the resident and non-resident estimates (**Res=SUM**).

3. **License/Permit Type used to Hunt or Harvest (L/P Type or Lpt):**

- **Combined (ALL):** Hunting and harvest information is summarized without regard to the Lpt used.
- **License Category (Gen Only, Special, Other, UnknDist, UnknKill):** At the State and Regional Location levels, hunting and harvest activity is summarized by grouped categories of the individual L/P Type subpopulations. **Gen Only** is for activity linked to General Only tag holders. **Special** groups activity for all special permit and A7 license holders. **Other** is for activity linked to special permit holders using their general tags in another area. **UnknDist** is for hunting or harvest which could not be linked to a Lpt held by the hunter and valid in the reported District. **UnknKill** is for harvest which could be linked to a Lpt held by the hunter and valid in the reported District, but the elk kill described could not be legally taken using the Lpt.
- **Specific L/P Type subpopulation (Gen Only, Special Permit, Special A7 License, Other, UnknDist, UnknKill):** At the Hunting District Location level, hunting and harvest information is summarized by individual L/P Type subpopulation. Special permits and A7 licenses are identified by the codes given in the printed Regulations booklet, and in the Elk Hunting Regulations Data Table. **Gen Only, Other, UnknDist, and UnknKill** have the meanings already given above.
- **Sum of estimates by individual L/P Type or License Category (SUM):** Hunting and harvest information for each Lpt is summed (within a given Location and Residency). There is no difference between summarized raw response data for Lpt=ALL and Lpt=SUM. There may be a difference between an estimate obtained when Lpt is disregarded (**Lpt=ALL**) versus an estimate obtained by summing the estimates for each underlying Lpt (**Lpt=SUM**).

For this "Across Year Summary Report" the estimates of elk hunting and harvest statistics from the three license years were joined into one table with the identifying variable License Year added. The formatted tables present the elk statistics for all three levels of Location, but where the underlying estimates by Residency are summed (Res=SUM) to obtain the statistics presented by L/P Type. The presented estimates where L/P Type=SUM represent the sum of underlying estimates by both Residency AND L/P Type (Res=SUM AND Lpt=SUM), within the Location, for the given License Year.

Organization of Elk Hunting and Harvest "Across Years" Tables

- **Executive Summary of Elk Hunting and Harvest Table:** This table is intended to provide a ***bottom line* view** of LY1999 to LY2001 Montana elk hunting and harvest, by Location (State, Regional, and by District), for each of the 3 years. Within each year, the statistics presented are those where the underlying estimates by Residency AND L/P Type are summed (**Res=SUM AND Lpt=SUM**). The tables begin with State and Regional statistics, then continue on to the District level statistics. Estimates of hunters, hunter days, harvest, and harvest by antlerless/antlered sex-age class are presented, as are relevant ratios such as Percent Success.

- **Overview of Elk Hunting and Harvest Table:** This table is intended to provide a somewhat more detailed view of LY1999 to LY2001 Montana elk hunting and harvest, by Location (State, Regional, and by District), for each of the 3 years. Within each year, statistics are presented by L/P Category or L/P Type, with a sum over all L/P Types. All statistics presented are sums of underlying estimates by Residency (**Res=SUM, Lpt=Lpts and SUM**). The tables begin with State and Regional statistics, then continue on to the District level statistics. Estimates of hunters, hunter days, harvest, and harvest by antlerless/antlered sex-age class are presented, as are relevant ratios such as Percent Success.

Definitions of "Across Years" Elk Hunting and Harvest Statistics

- **Hunters:** Point estimate of total number of active elk hunters.
- **Hunter Days:** Point estimate of cumulative number of days or partial days spent hunting elk by elk hunters.
- **Days Per Hunter:** Ratio of Hunter Days to Hunters. An estimate of the average number of hunter days spent hunting by elk hunters. An indicator of elk hunting effort.
- **Harvest:** Point estimate of total number of elk harvested.
- **Percent Success:** Ratio of Harvest to Hunters expressed as a percent. An estimate of the percent of active elk hunters harvesting an elk. An indicator of elk hunter success.
- **Days To Harvest:** Ratio of Hunter Days to Harvest. An estimate of the average number of hunter days required to harvest an elk. An indicator of elk hunter success.
- **Antl? (Harvest Antlers Unknown):** Sum of Harvest Antlers Unknown and Bull Antler Point Class 0.
- **Antl- (Harvest Antlerless):** The sum of calves and cows. An estimate of the legally antlerless elk harvest.
- **Antl+ (Harvest Antlered):** Bulls in Antler Point Classes 1 through 9. An estimate of the legally antlered bull elk harvest.
- **Pcnt Antl-:** Percent of harvest classified as legally antlerless elk.

Notes Applying to "Across Years" Elk Hunting and Harvest Tables

- **Undefined, missing, or not applicable values are presented in the report as –0.0 or -0.** Undefined expansion factors (-0.000) occur when there are no respondents at a combination of the identifying variables. All estimates of hunting and harvest based on an undefined expansion factor are also undefined (-0). Undefined ratios and percents occur when the denominator of the ratio is zero. This can occur when response data indicated no hunting or harvest. Rows where Res=SUM or Lpt=SUM do not have expansion factors. (They are sums of existing estimates with defined expansion factors.) The expansion factor is not applicable to these rows (–0.000).
- **Out of range values are indicated with #####.** These occur when the numerator of a ratio, relative to the denominator, is so large that the ratio is essentially meaningless.

- **The sum of the presented values across all categories of a frequency distribution may differ slightly from the presented total value.** For example, harvest versus the sum across sex age classes. The harvest estimates are formatted in the report as whole numbers, though in the underlying data set they are stored as floating point real numbers. The sum of presented rounded values may not exactly equal the rounded total value.
- **If the hunting estimate was zero** for a particular combination of the identifying variables, then that row was not output to the tables.
- **The page numbers** in the lower right hand corner of each page indicate the consecutive page number in the report. The page numbers in the upper right of each table title header indicate a page within a given table. Each table will have numbered consecutive pages.
- **The date July 30, 2002** printed in the table titles and throughout this report indicates the date the presented estimates of LY1999 to LY2001 elk hunting and harvest statistics were assembled into a single dataset. This provides a version stamp in the event the statistics for one or more license years are regenerated or an additional license year is added.
